

Ramaiah Institute of Technology
(Autonomous Institute, Affiliated to VTU)
Department of Civil Engineering

Term: Sep-Dec 2025 Subject and Code: Environmental Studies-HS 510

Maximum Marks: 30

CIE Test No.: 1

Semester: 5

Time:

1 Hour

Instructions: Part A is Compulsory

Part B: Answer any 2 out of 3 Questions

Sl No	Questions	CO's	Bloom's level	MARKS
Part: A Compulsory Multiple Choice Questions				
1.	Environmental studies is considered as a multidisciplinary subject because it: a) Deals only with plants and animals b) Combines knowledge from different fields like biology, chemistry and social sciences c) Studies only pollution and conservation d) Is limited to engineering and technology	1	2	01
2.	The correct sequence of energy flow in an ecosystem is: a) Producers-decomposers-consumers b) Consumers-producers-decomposers c) Producers-consumers-decomposers d) Decomposers-consumers-producers	1	2	01
3.	Which of the following best defines biodiversity? a) The total number of trees in a forest b) The variety of life forms in an ecosystem c) The amount of rainfall in an area d) The number of endangered species only	1	2	01
4.	Which of the following is a major threat to biodiversity? a) Sustainable development b) Habitat destruction c) Natural succession d) Controlled grazing	1	2	01
5.	Sustainable development aims at a) Use all natural resources quickly b) Conserve resources for future generations c) Focus only on industrial growth d) Ignore environmental protection	1	2	01

6.	The ecological importance of forests is mainly due to their ability to a) Produce minerals b) Maintain ecological balance and biodiversity c) Increase soil erosion d) Reduce rainfall	1	2	01
7.	The largest share of global fresh water is found in a) Rivers b) Underground aquifers c) Glaciers and ice caps d) Lakes	1	1	01
8.	Which of the following is an environmental impact of mineral extraction? a) Soil conservation b) Deforestation and land degradation c) Increased groundwater level d) Improved air quality	1	2	01
9.	One of the negative effects of modern agriculture is a) Conservation of biodiversity b) Soil fertility improvement c) Groundwater depletion due to over irrigation d) Organic farming promotion	1	2	01
10.	Desertification refers to a) Conversion of fertile land into desert b) Increase in rainfall in desert areas c) Rapid forest growth in dry regions d) Use of land in afforestation	1	2	01
	Part B: Descriptive Questions: (Answer Any Two Questions)			
1a	Define environmental studies and explain its scope and importance.	1	2	05
1b	Discuss the effects of Modern Agriculture.	2	2	05
2a	Describe the multidisciplinary nature of environmental studies mentioning the importance of each.	1	2	05
2b	Bring out the ecological importance of forests.	2	2	05
3a	Discuss the environmental effects of extracting and processing mineral resources.	2	2	05
3b	What is meant by biodiversity? Explain the scope and importance of biodiversity.	1	2	05
