

SEMESTER END / BACKLOG SUBJECT EXAMINATIONS - FEB / MARCH 2025

Program	: B.E. - Common to all Programs	Semester	: V
Course Name	: Environmental Studies	Max. Marks	: 50
Course Code	: HS510 / HS59 (2021,2022 Batch)	Duration	: 2 Hrs

Instructions to the Candidates:

- **PART - A** : Answer all the questions.
- **PART - B** : Answer one full question from each unit.

PART - A UNIT - I

- What type of human activity can lower the atmospheric oxygen content? CO1 (01)
 - Deforestation
 - Hunting
 - Mining
 - None of the above
- What is a food chain? CO1 (01)
 - long chain made of food
 - Process of preparing food
 - Food where locked by chain
 - Pathway that energy and nutrients flow through the ecosystem
- Which of the following food chain correctly describes the flow of energy in an ecosystem? CO1 (01)
 - Grass->lion->human
 - Cow->grass->lion
 - Grass->goat->human
 - Leaf->bird->lizard
- All species on earth with each other along with their respective environments collectively constitute CO2 (01)
 - Biosphere
 - Atmosphere
 - Hydrosphere
 - Lithosphere
- Name the gas that is vital in maintaining atmospheric temperature CO2 (01)
 - Oxygen
 - Carbon Dioxide
 - Nitrogen
 - None of the above
- Which of the following nonrenewable energy is not classified under a fossil fuel? CO3 (01)
 - Nuclear
 - Petroleum
 - Oil
 - Natural gas

HS510/HS59

7. Which of the following is a disadvantage of renewable energy? CO3 (01)
a) High pollution
b) Available only in few places
c) High running cost
d) Unreliable supply
8. The main composition of biogas is CO3 (01)
a) Methane
b) Carbon dioxide
c) Nitrogen
d) Hydrogen
9. With respect to environment science, full form of SPM is CO3 (01)
a) Suspended Partial Matter
b) Suspended Pollutant Matter
c) Suspended Particulate Matter.
d) None of these
10. A poisonous gas given out of a vehicle exhaust is CO4 (01)
a) Methane
b) Ethane
c) Carbon di oxide
d) Carbon Monoxide
11. Minamata disease is related to which of the following? CO4 (01)
a) Hg pollution
b) Cd pollution
c) SO₂ pollution
d) None of these
12. Syringes are examples of CO4 (01)
a) Industrial wastes
b) Biomedical wastes.
c) Domestic wastes.
d) Radioactive wastes.
13. Which layer of the atmosphere contains the ozone layer necessary for UV (ultraviolet) light absorption? CO5 (01)
a) Stratosphere
b) Troposphere
c) Mesosphere
d) None of these
14. Which of the following is not a major greenhouse gas? CO5 (01)
a) ozone
b) water vapour
c) methane
d) carbon dioxide
15. Surplus of atmospheric carbon dioxide causes an increase in the greenhouse effect as carbon dioxide CO5 (01)
a) is opaque to infrared rays
b) is not opaque to infrared rays
c) precipitates dust in the atmosphere
d) reduce atmospheric pressure

16. Which of the following is an example of a non-renewable energy source with significant environmental impact? CO5 (01)
a) Wind energy
b) Solar energy
c) Natural gas
d) Geothermal energy
17. What is the primary cause of coral reef bleaching and deterioration? CO5 (01)
a) Overfishing
b) Pollution
c) Global warming
d) Tidal waves
18. Which international treaty aims to protect and conserve biodiversity? CO5 (01)
a) Kyoto Protocol
b) Montreal Protocol
c) Cartagena Protocol
d) Convention on Biological Diversity
19. Which of the following is a common method for reducing plastic pollution in oceans? CO5 (01)
a) Recycling
b) Incineration
c) Dumping in deep sea trenches
d) Landfill disposal
20. What type of energy source is derived from the heat stored in the Earth's interior? CO5 (01)
a) Geothermal energy
b) Fossil fuels
c) Wind energy
d) Tidal energy

PART - B **UNIT- I**

1. Define Biodiversity and explain the threats of biodiversity. CO1 (06)
2. Elaborately explain the concept of sustainability. CO1 (06)

UNIT- II

3. Explain the concept of global water resources distribution . CO2 (06)
4. Explain soil erosion and desertification . CO2 (06)

UNIT- III

5. Explain step by step procedure of conducting EIA. CO3 (06)
6. Explain hydrogen fuel cell and nuclear energy. CO3 (06)

UNIT- IV

7. Explain briefly the sources of Air pollution. CO4 (06)
8. Explain the treatment methods applied in municipal solid waste. CO4 (06)

UNIT- V

9. Briefly explain ozone layer depletion. CO5 (06)
10. Briefly explain global warming and climate change. CO5 (06)
